

Faculty of Economics and Management

Chair of Innovation Economics

Prof. Dr. Knut Blind

Guidelines

Theses & Term papers

1. General information

In general, theses should be written in English. German might be possible if the supervisor agrees in advance. Three printed copies, one electronic copy (as a pdf-file saved on a USB-stick), the database from the reference manager of your choice (Citavi licenses are provided by the University), and the raw and processed data should be delivered on time to the examination office. Additionally, a digital copy of your thesis should be sent to Brigitte Essoun (brigitte.essoun@tu-berlin.de).

1.1 Length

Master theses should be no longer than 70 pages, Bachelor theses no longer than 40 pages (not counting cover sheet, table of contents, appendices and bibliography).

Term papers are written for seminars or projects during advanced studies. They usually serve as preparation for a Bachelor or Master thesis. A term paper is usually written by an individual student. The length of term papers will be set within the respective course.

1.2 Your topic selection process

Students can apply for topics that are published on our website or with topics selected/developed by themselves. Students that decide for given topics should directly approach the responsible researcher by mail indicating their chosen topic and providing a current CV and transcript of records. Should you want to pursue your own topic please contact Mr. Boehmecke-Schwafert (moritzbs[at]tu-berlin.de) indicating your chosen topic and providing a current CV and transcript of records.

2. What defines academic writing - Fundamentals of academic writing

- A strong, precise research topic
- Comprehensible and transparent work
- Reference to theory
- Novelty and contribution to current research (e.g., development of a new model and the creation of verifiable hypotheses)

A *comprehensive introduction to academic writing* can be found here:

- Online guide to academic writing (Leeds University):
<https://library.leeds.ac.uk/skills-writing>
- Academic writing guide - City University of Seattle:
<http://www.vsm.sk/Curriculum/academicsupport/academicwritingguide.pdf>
- Academic Writing: A Guide to Tertiary Level Writing:
<http://owll.massey.ac.nz/academic-writing/academic-writing-e-book.php>

3. Project planning and time management

3.1 First draft

- Get an overview of available literature
- Select promising articles/journals/books etc.
- Develop an understanding for the research topic and determine aims
- Write an exposé (2 pages) including an outline and time schedule to be handed in to the advisor before registration at the examination office.

3.2 Final draft

- Make a time schedule
- Make a systematic search for literature according to specifications
- Work on the content of the research topic
- Write the paper; make appendices, illustrations, tables etc.
- Review and correct
- Layout and print

4. Systematic literature search and selection

4.1 Documenting the literature search and selection process

The process of literature search and selection should be documented comprehensibly. Therefore, the search strategy has to be documented in your thesis, and the selection of any literature justified. The following information should be supplied: which database was used; search terms and other criteria used to narrow the search. Additionally, the quality of journals used should be considered. Several indicators and rankings exist, e.g., the VHB-Journal ranking or H-indices.

The results of the search must be processed (in addition to the above) by adequately selecting items according to the relevance to the research topic. The time consumed by the literature search should not be underestimated.

What to remember while examining literature: What is the current state of research? What is its basis? Where is the discussion leading? Which solutions already exist to my problem? Critically reflect on what you read (i.e., gaps, generalizations, contradictions, etc.) Does the text contain any solutions/ideas, which could be helpful in my research?

4.2 Analyzing literature

- What does it contribute to the field?
- What can it contribute to my research?
- Which position does the author take? Does (s)he criticize?
- Which sources are quoted? Are they relevant to my research?

5. Structure of the paper

5.1 Table of contents

The table of contents should reveal which topics are relevant to solving the research problem, which relevance each aspect of the problem has and how they relate to each other.

Each section must have at least two entries. Excessive sub-sectioning is not encouraged; three levels are sufficient in most cases.

Reviewing the table of contents: Are all the sections relevant to the research topic? Are the headings descriptive of the contents? Does each section contain roughly the same amount and depth of subsections? Do all subsections correspond to their section? Is the order of the sections logical?

5.2 Basic elements of academic papers/theses and their functions

Cover page

Table of contents

Assurance of academic integrity

List of figures and tables (where applicable)

List of abbreviations (where applicable)

Introduction

- Importance and relevance of the topic
 - Research topic, aims, and research gap/problem
 - Structure of the paper
-

Literature review/Conceptual framework

- Definition of essential terms and concepts
 - Theoretical framework
 - The current state of research
 - Critical analysis of existing literature
-

Main section

- Methodology/methods
 - Analyses
 - Results
 - Findings
 - Discussion
-

Conclusion

- Concentrated description of the most important results
 - Limitations of the paper
 - Conclusions and ideas for future research
-

Bibliography

Appendix (where applicable)

- Search strategy and its results
- Summary of literature
- Unwieldy figures/tables

Page numbering: The first page of the paper is the cover page. The table of contents and further indexes before the actual text are to be numbered using Roman numerals. The pages in the text should be numbered using Arabic numerals. Footnotes can be numbered sequentially. Appendices must be numbered with Roman numerals. They represent a continuation of the introductory indexes and should be numbered accordingly.

5.3 Important things to remember

- Write for the target audience
- Raise interest (even academic papers can tell a good story!)
- Preserve clarity (formal structure, illustrations and models, clear goals, transitions)
- Precision and depth (do not incorporate too many ideas, focus on some and follow them consciously and accurately)
- Consistent use of terms (only use terms the way they were defined)
- Consistent and justifiable arguments (use literature to back your arguments!)

6. Referencing

Only use the APA citation style. For all details with respect to the proper use of the **APA citation style**, please refer to [the APA documentation](#).

The use of a citation software such as Citavi or Endnote is **mandatory**. A free license of Citavi can be obtained with your TU-Account. Introductory courses to Citavi and the proper use of referencing styles regularly take place in the university library. Use original sources when possible, i.e. do not cite a citation!

Important: All ideas adopted literally or contextually from others must be made visible in the text. Internet sources are acceptable but the internet address (URL) and the date it was accessed must be provided. However, the main source of information should be articles published in peer-reviewed journals.

7. Figures and Tables

Figures from other sources may be inserted unchanged or modified. If the figure has been modified the caption must read “Based on...”. Abbreviations that are defined in a dictionary should not be included in the list of abbreviations in the preface. A list of figures and tables is mandatory if the thesis contains figures or tables.

8. Proofreading

Gaining some distance from your work can be beneficial, so leave plenty of time for proofreading. Often a printed version is helpful when proofreading. Make sure to find someone in advance who will read the paper, correct mistakes, and check and discuss its content. Readability can be heavily impeded by mistakes in spelling and grammar. Therefore, we recommend examining your work repeatedly and carefully. Academic work should exhibit a high standard with regards to the content but also the language. Colloquial terms and phrases or subjective wording that show the writers lack of distance to a given topic should be avoided. Adequate wording, however, does not mean the text must be complicated or difficult to read

and understand.

9. Assurance of academic integrity

Bachelors and Masters theses must contain an assurance of academic integrity that states the creator worked independently using only the sources named. Additionally, the paper must not be presented to any other examination panel. The assurance of academic integrity is to be signed and placed after the table of contents. It must have the following wording:

Eidesstattliche Erklärung	
Hiermit erkläre ich Eides statt, dass ich dir vorliegende Arbeit selbstständig und ohne unerlaubte fremde Hilfe angefertigt, andere als die angegebenen Quellen und Hilfsmittel nicht benutzt und die den benutzten Quellen wörtlich oder inhaltlich entnommenen Stellen als solche kenntlich gemacht habe.	
_____	_____
Place, Date	Signature

10. Formatting

- **Format:** DIN A4; pages should be printed one-sided using an established word processor
- **Margins:** 1 inch each
- **Text:** Times New Roman (12 points), or Arial (11 points), justified, 1.5 line spacing (single-spaced inside tables)
- **Heading:** first-level headings 14 pt bold (spacing: 18 pt before, 12 pt after), second-level headings 12 pt bold (spacing: 12 pt before, 6 pt after), third-level headings italic and 12 pt (spacing: 6 pt before, 6 pt after)
- **Paragraph:** 6 point gap
- **Page numbering:** The title page is not numbered. The tables of contents and lists of figures and tables or lists of abbreviations are numbered with Roman numerals. The text and bibliography are numbered with Arabic numerals and appendices with A1 etc.
- **Footnotes:** Times New Roman (10 points), or Arial (9 points), justified, single-spaced
- Figures and Tables that take up one page or more should be placed in the appendix. Smaller figures and tables can be shown in the running text.
- You may scarcely use bold or italic font in order to emphasize.
